EDUCATION

Canadian University of Bangladesh (CUB)

B.Sc. in Computer Science and Engineering Feb 2022 – Oct 2025

- **Cumulative GPA:** 3.73 / 4.00
- **Thesis:** Phishing URL Detection Using Machine Learning: A Lightweight Offline Approach.
- **Adviser:** Md. Hasanuzzaman, Head of the Department
- **Focus:** Phishing URL Detection, Machine Learning, Lightweight Offline Systems, Zero-Network-Dependency (ZND), Lexical Feature Engineering

GED Testing Service (Online), Washington, DC, USA

High School Equivalency Credential (GED) Jul 2019 – Mar 2020

Dinajpur School of Liberators / LAMB English Medium School, Dinajpur, Bangladesh

- Ordinary Level General Certificate of Education (GCE O Level) May 2018 – Jul 2019
  - EQF Level 3
  - Core Sciences, Mathematics, English, and Bengali.

RESEARCH EXPERIENCE

Undergraduate Research Work Aug 2025 – Dec 2025

Project: *A Hybrid Stacking Ensemble Framework for Predicting Mathematics Avoidance Behavior: Integrating Explainable AI (XAI) for Pedagogical Sustainability in Bangladesh.*

- **Research Supervisors:** Tahmina Islam, Tajel Hossan
- **Focus:** Mathematics Anxiety, Pedagogy, Explainable AI (XAI), Machine Learning
- **Key Contribution:** Conducted a thorough literature review to identify key behavioral indicators and establish a theoretical framework for analyzing Bangladeshi student performance data. Curated, cleaned, and sorted an original dataset of 1,953 records, transforming raw survey responses into a standardized structure optimized for predictive modeling. Applied exploratory data analysis (EDA) and built a hybrid stacking ensemble model to uncover behavioral patterns and enhance performance forecasting.

PUBLICATIONS

JOURNAL ARTICLES (UNDER REVIEW / SUBMITTED)

[1] Md. Tazel Hossan, Md. Atiqur Rahman Sifat, Fahmida Fardousi, Muhammad Imtiaz Ahmed, **Most Rimi Moni**, and Tahmina Islam, "Explainable AI for Predicting Mathematics Avoidance in Higher Education: A Control-Value Theory Guided Approach," *Computers in Human Behavior Reports*, *Submitted*, Manuscript No. CHBR-D-26-02186.

- **Key Contribution:** Contributed to the literature review and curated/sorted the research dataset, supporting the development of a control-value theory guided framework using Explainable AI for higher education analytics.

EXTRA CURRICULAR & ACTIVITIES

LIBMUN 2018,(Liberators Model United Nation) Dinajpur 2018

- Director of Conference Management. Managed end-to-end logistics, venue setup, and operational planning for all committee sessions and ceremonies. Led a dedicated operations team to manage registration, hospitality, and real-time crisis resolution throughout the event.

Debating and Public Speaking Club / Activities 2015 – 2018

- Active participant in school-level debates, parliamentary-style discussions, and public speaking events.
- Developed strong verbal communication, critical thinking, and argumentative structuring skills.
- Engaged in collaborative team preparation and research for various contemporary topics.

Dinajpur Flash Flood, Dinajpur

- Relief Distribution Volunteer 2017
  Distributed relief supplies to flood-affected individuals alongside friends and the Dinajpur School of Liberators.

WORK EXPERIENCE

Fiverr, Online, Bangladesh

- Graphic Designer Jun 2020 – Present

- Collaborate with international clients to translate requirements into accurate and efficient visual designs using Adobe Creative Suite.
- Achieved and maintained Level 1 Rank seller status through high-quality delivery and customer satisfaction.
- Manage end-to-end design projects from initial concept to final production while handling business communication and time management.

Self-Employed, Dhaka, Bangladesh

- Private Tutor May 2022 – Present
  - Actively teaching English medium students for over 4 years to enhance academic performance.
  - Develop customized lesson plans and problem-solving strategies tailored to individual student needs.
  - Strengthen communication and interpersonal skills through regular interaction with students and parents.

PROJECTS

Advanced Predictive Modeling Portfolio

- Developed a suite of Machine Learning models to solve diverse classification and regression problems.
  - **Credit Scoring Model:** Built a supervised machine learning pipeline in Python to assess consumer creditworthiness and default risk. Leveraged exploratory data analysis and feature engineering on financial records to optimize model precision and recall for lending institutions.
  - **Heart Disease & Diabetes Prediction:** Developed clinical diagnostic classification models utilizing Support Vector Machines (SVM) and ensemble techniques. Processed complex patient biomarker datasets to forecast disease susceptibility with high diagnostic accuracy.
  - **Tools used:** Python, Scikit-learn, Pandas, Matplotlib, Seaborn.

Computer Vision & Specialized Analytics

- Applied deep learning and signal processing techniques to complex datasets.
  - **Handwritten Character Recognition:** Designed and trained a deep neural network architecture to accurately detect, recognize, and classify handwritten alphanumeric characters. Implemented image preprocessing and convolution techniques to enhance pattern recognition performance.
  - **Stock Market Analysis:** Performed rigorous financial market research using advanced Time Series methodologies and rolling window statistical indicators. Quantified asset volatility, moving averages, and cross-asset correlations to support data-driven investment strategies.
  - **Tools used:** Jupyter Notebook, XGBoost, NumPy, Pandas.

HONOURS & AWARDS

- Kickoff Programming Contest, 8th Place, Canadian University of Bangladesh Apr 2022
- Bangladesh Math Olympiad, 1st Runner Up (Regional), Regional Contest 2016

LANGUAGES

Bengali: Native language.
English: Fluent.
Hindi: Intermediate.

SKILLS

Programming: Python, C, C++, Java, SQL

Web development: HTML, CSS, JavaScript, WordPress

Software: Excel, Adobe creative Cloud.

INTERESTS

Machine Learning, Artificial Intelligence, Automation, Teaching, Cooking, Travelling, Reading.
